Professional Summary: Seasoned educator transitioning into the tech industry as a dynamic Full Stack Web Developer, equipped with a robust background in English language and literature. Expert in crafting engaging web applications and adept at conveying complex concepts in accessible formats. Demonstrated leadership qualities and a unique combination of technical acumen and teaching experience.

Education:

- Full Stack Web Development Bootcamp, University of Texas at San Antonio (EdX) (Aug 2023 - Feb 2024) Focused on hands-on development of full-stack applications, emphasizing modern web technologies and collaborative project work, preparing for a transition into the tech sector.
- M.A. in English, Texas A&M International University (May 2020) Cultivated deep analytical and critical thinking skills, alongside effective written and oral communication abilities, through intensive literary analysis and academic research.
- B.A. in English/History, Texas A&M International University (Aug 2011) Developed a strong foundation in research methodologies, historical context analysis, and thematic exploration, forming the bedrock for problem-solving and creative solution development.

Technical Skills:

- Proficient in HTML, CSS, JavaScript, Node.js, React.js, and Git.
- Competent in database management using SQL and MongoDB.
- Developed and deployed 30+ full-stack web applications, showcasing a thorough understanding of software development life cycles and agile methodologies.
- Committed to responsive web design and development best practices, ensuring optimal user experience across a variety of devices.

Professional Experience:

- Proven ability in leading classrooms and educational programs, translating to effective team management and project coordination in technology-driven environments.
- Experienced in curriculum design and instructional strategies, paralleling the structured yet flexible approach required for successful software development.
- Bilingual communication skills in English and Spanish, enhancing team collaboration and client interactions in a global tech landscape.

Personal Projects:

- Successfully completed several time-sensitive group projects, honing the ability to deliver under pressure and demonstrating an agile and adaptive work style.
- Advocated for and implemented user-centric design principles, resulting in intuitive and accessible application interfaces.
